

Tensioning Tool for 6mm Catenary

Lightweight tool that is ideal for applying regulated tension to horizontal catenary installations

PRODUCT FEATURES AND BENEFITS

- Apply tension easily with the 6:1 gear drive mechanism
- Integral tension gauge for precision tensioning up to 100 kg
- Compact, easy to handle, operate and carry
- For use with 6 mm Catenary kits only
- Weighs 1.1 kg only
- Mouthpiece offers optimum connection with the D6 6 mm

INSTALLATION

Step 1: Rotate the dial to the required tension (max 100 kg).

Step 2: Position the tool mouthpiece against the Lockable Gripple and open both handles until the cam will accept the tail of the wire rope.

Step 3: Squeeze the handles together to tension and repeat until the torque handle clicks.

Step 4: When the torque handle clicks, the desired tension has been reached and the handle will displace.

PRODUCT SPECIFICATIONS

Over-tensioning may stretch the internal construction of the wire or pull-out anchoring points.

A (mm)	B (mm)	C (mm)
