We are pleased to introduce the "Green Wall" stainless steel trellis system. The system is made up of a clever stainless steel wire hub allowing the crossing and tensioning of wires to form trellis sections.

There are many design variations possible using the component parts. Please ring if you would like to talk about bespoke sizes or any aspect of your particular design ideas.....

.....narrow spaces, fan shapes, L shapes, even entire building sides.

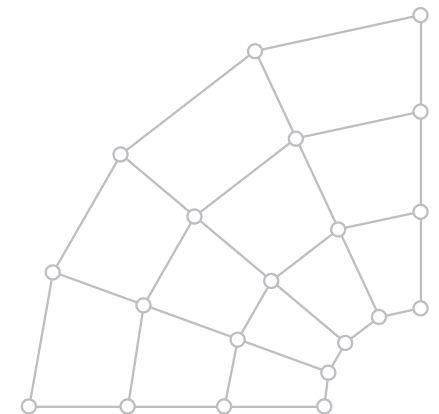

Trellis Hub

Manufactured from high quality 316 grade solid stainless steel bar with a high quality finish.

Wire rope manufactured from high tensile, high quality AISI 316 stainless steel grade 1.4401 in fully austenitic condition to give maximum corrosion resistance.

All wire supplied clean and dry, with good surface finish. They will provide you with trouble free maintenance for many years.

Incredibly easy to fit - it screws directly into timber or into masonry with appropriate plastic screw plugs. The cylindrical hubs have a central screw which can be tightened with an allen key to grip onto the 3mm diameter stainless steel wire.
